

FUNDAMENTALS OF NURSING ASSIGNMENT

1. a) My mum is a retired nurse, I grew up seeing her impact lives positively through her profession. She found fulfillment providing care, comfort and support to patients during times of illness and vulnerability, and it influenced me so much so that I also wanted to do what she was doing.

b) Yes. I will still choose nursing because of the fulfillment it has given me in my few years of practice.

2) In life, I uphold some values such as impartiality; Treating human life as precious irrespective of social status, race or religious background. I also value accuracy and punctuality in all I do.

3. a) In the next five years, I will like to impact more lives than I am doing now, by passing on the knowledge and skill I have acquired, to another generation of nurses, and coaching them to become even better than me. I will also like to become part of the decision making body, so as to advocate for nurses and the nursing profession.

b) I intend to achieve this by working hard in my studies now, and also becoming an active member of the nurses association.
