

COURSE : Fundamentals Of Nursing

1) a. What motivated you to join the nursing profession?

Answer : My motivations primarily is the compassion and love to render care towards others. Also just finishing from High School with no career orientation I was let by my parents to join the nursing profession, although in mind I aspired being a medical doctor. So I believe God saw my desire in caring for others that He let me to the nursing profession.

b. If you were to start all over today, will you still choose nursing?

Answer : To be candid if I were to start over I will not choose nursing due to some aspects that I have encountered in the field and as a person of which I will name a few;

- little or no compassion by other staff. For example I was performing a cardiac massage to a patient trying to bring her back to life only for my colleague to come and pull me off the patient that I should not bother myself that the patient is gone in the mist of the carers. I felt like pouncing my colleague on the face.
- Despite the compassion I have to help others, the income of nurses in which I practice is quite low and barely meet up with family needs.

2) What are your values and philosophy as a person?

As a person, I generally love to care for others and my joy is to see that I have actually put a smile on someone's face. My philosophy as a person is that, my words should not be a reason that someone will experience a bad day.

3) a. Career wise, where do you expect to see yourself in the next 5 years?

Answer: My aspirations in the next 5 years is to have advance in my nursing career and possibly to have a masters degree and above all to be zealous in winning souls for the LORD.

b. How will you get to 3(a) above?

Answer: I believe by having a Bachelors degree in Nursing will be a step to my career advancement.
