

1a. As a nursing student, I was motivated to join the nursing profession because of my passion for helping others and making a positive impact on people's lives. Nursing allows me to provide compassionate care, support patients and their families during challenging times, and contribute to the overall health and well-being of individuals and communities.

1b. If I were to start all over today, I would still choose nursing as my profession. Despite the challenges and demands it entails, nursing has provided me with rewarding experiences and opportunities for personal and professional growth. The sense of fulfillment I get from being able to help others and make a difference in their lives outweighs any difficulties I may face along the way.

2. As a person, my values include empathy, integrity, respect, and lifelong learning. I believe in treating others with kindness and respect, maintaining honesty and ethical behavior, and continuously seeking knowledge and growth. These values translate into my nursing practice, where I strive to provide patient-centered care, uphold professional ethics, and remain open to learning and adapting to new advancements in healthcare.

1. 3a. In the next five years, I envision myself furthering my nursing career and gaining more experience and expertise. I aim to work in a specialized area of nursing, such as critical care or pediatric. I also hope to pursue higher education, such as a master's degree or advanced certification, which would open up additional opportunities for leadership roles or teaching in the nursing field.

3b. To achieve my goals mentioned above, I plan to actively seek out opportunities for professional development, such as attending conferences, workshops, and seminars. I will also strive to build a strong network of mentors and colleagues who can guide and support me in my chosen career path.
