

Homework for Ngoran Mirabel

Q1a) My motivation to do Nursing.

Initially I never wanted to be a nurse but a laboratory technician. After completing my high school I decided to work in a hospital for a year as a cashier in order to raise funds for fees.

During my stay in the hospital I was marveled at the way people got healed through the care they received.

People coming into hospital on wheelchairs and stretchers with tears and pain yet they leave few days later walking and smiling. I was moved at how the nurses dedicated their lives to ensure every patient was happy and there I knew I wanted to be one of the people who will put smiles on others faces by caring for them in their weakest point.

1b) I will still choose nursing over and over again

Q2) My values and philosophy as a person are honesty/truth, generosity, self confidence, integrity, courage, Kindness, friendship, love, respect.

Q3a) In the next five years I see myself as an Orthopaedic Advance Nurse practitioner or Nurse consultant

3b) To be a nurse practitioner will entail first getting a job as an orthopaedic Nurse which i am working on it already. Secondly registering for my masters in orthopaedic nursing after completing my bachelor degree.
